

Introduction

The Biworld 810 series water hammer arrester is designed for a single outlet, such as a tap or washing machine, or a small group of services, such as a bathroom supplied via a manifold. Biworld water hammer arrester is maintenance free and can be installed in any orientation. The arrester should be installed close to the tap or valve minimizing the effect of the shock on the system.

Technical Specification

- Medium: water
- Maximum working temperature: 120°C
- Maximum working pressure: 15 bar
- Maximum water hammer pressure: 50 bar
- Operating start pressure: 3 bar
